

Endocrinology

At Thomas Health, we are committed to designing a treatment plan that meets your individual health care needs. We specialize in the treatment and care of people living with all forms of diabetes, thyroid disorders, metabolic bone diseases (such as osteoporosis) and other problems involving the endocrine (or gland) system. Our endocrinologists are committed to providing patient-centered care, and we value not only our patients, but also our referring physicians as an integral part of our health care team.

Other common diseases and disorders managed by our endocrinologists include:

- Metabolic diseases
- Menopause and its hormonal unbalances
- Over- or underproduction of hormones
- Osteoporosis and vitamin D deficiency
- Excessive growth or acromegaly/gigantism
- Cancers of the endocrine glands
- High blood pressure due to endocrine dysfunctions like adrenal gland tumors pheochromocytoma
- High blood cholesterol or lipid abnormalities associated with heart disease

Thomas Health Diabetes Education Center

The Thomas Health Diabetes Center combines education, consultation, goal evaluation and support to help people with diabetes learn how to eat right, exercise and keep up with medications. Staff includes dietitians, certified diabetes educators, nurse practitioners and registered nurses. Registered dietitians work one-on-one with patients and family members to ensure customized meal plans and/or diet plans as ordered by referring physicians.

Patients are referred by a primary care physician. A physician's order is required for all services.

For more information, please call the Thomas Health Diabetes Education Center at (304) 766-5616.
